

SCOSTEP solicitation of proposals for future STP and other SCOSTEP meetings (from F.J. Lübken, October 12, 2011)

As a part of its mandate every 4 years SCOSTEP organizes STP (Solar Terrestrial Physics) scientific symposia. In 2010 the STP12 symposium was held in Berlin, Germany (<http://www.iap-kborn.de/SCOSTEP2010/>). The next STP13 symposium will take place in Xi'an (China) in 2014. Details on the meeting will be posted as they become available. SCOSTEP encourages the submission of proposals for organizing the STP meeting in 2018. Proposals should be sent to the SCOSTEP secretariat no later than the end of 2015 with all relevant information (motivation for proposal, date/place of the meeting, specific national aspects, number of expected participants, available facilities, available financial support from national agencies, etc.).

Furthermore, SCOSTEP encourages the organization of scientific symposia and workshops related to its scientific programme(s), the CAWSES (Climate and Weather of the Sun- Earth System) being SCOSTEP's current one. Proposals shall be sent to the scientific secretary of SCOSTEP as early as possible, but not later than two years before the meeting. Some financial support may be granted after evaluation and approval by the SCOSTEP Executives and Bureau.
